HOTPLASTER

Arnica patch is formulated with plant extracts of Arnica montana and Devil's Claw, to give a feeling of relief in the skin area where it is applied. The formula is designed to soothe and balance the health of the skin. You can use the patch in case of tension accumulated during the day or after physical activity. The presence of Vanillyl Butyl Ether gives a sensation of superficial heat on the skin. The special technology guarantees the action of the patches for 24 hours, while the duration of the hot effect tends to run out after a couple of hours.

WART PATCHES

(containing)
35%
salicylic acid

Wart patches facilitate the removal of common and plantar warts as they adapt perfectly to the treatment area. The patches provide effective occlusion therapy, thus facilitating wart removal. Moreover, they prevent the risk of bacterial infections and the spread of warts to other people or areas. These non-medicated wart patches create a particular micro-climate, preserving the area against environmental factors and keeping it moist during the healing process, thus softening the skin and facilitating the mechanical removal of the wart. Saturated Salicylic Acid.

adhesive wound DRESSINGS

Adhesive wound dressing
ULTRA PORE

This self-adhesive absorbent dressing made from soft nonwoven material and is designed for low to moderately exuding wound, such as surgical wounds, cuts and abrasions. Skin friendly adhesive provides a gentle but secure fixation. Made from an elastic non-woven material backed with a non-irritating latex free adhesive this dressing does not adhere to the wound, which reduced any risk of damage during dressing removal. Very flexible-easy to apply on difficult areas like hands, elbows and knees. Surgical dressings serve several functions. They protect a wound, reducing the risk that infectious agents will enter and colonize the area. They also collect exudate, the material which seeps from the wound, which can be important from a sanitary and aesthetic perspective.
